Diabetes Management Program

Description: This diabetes management system provides tools to MDI (multiple daily injections) patients to support them in following the recommended therapy and insulin dosing instructions. Each product contains a PUI Audio transducer.

Why PUI Audio: The company wanted a second source and reached out to PUI Audio. We provided samples that met expectations and were approved and added to the bill of materials.

Product #: HD-EMB1104-SM-2 - PUI Audio 11mm x 4mm Eccentric Rotating Mass (ERM) Actuator designed to operate with 2.7 VDC. The surface-mount motor can be directly soldered to the PCB, ensuring a easy implementation and optimal performance.
